Education

BSc. Creative Technology
University of Twente, Enschede, NL
Expected graduation: June 2027
Relevant coursework: User Experience Design, Interaction Design, Research for User Experience

Projects

Off-Ice Skating Trainer - University Project
October 2025 - January 2026

- Conducted 8 preliminary interviews with stakeholders (ice-skating coaches, beginner ice skaters)
- Designed methodology to test an interactive, off-ice skating system, informed by previous interviews
- Created a working prototype using wearable IMU sensors and PyGame Library
- Conducted 30 user tests and validated research, demonstrating a positive effect on user's self-perception of skill

Tourism Game - University Project for Enschede Promotie
February 2025 - April 2025

- Worked with 5 students as lead UX designer and interviewer building landmark-based game to increase youth engagement with local tourism
- Conducted 10+ usability tests and interviews which uncovered user needs and informed game mechanics
- Prototyped physical "waypoints" users could interact with using mobile phones to capture landmarks
- Delivered functional prototype and design documentation for municipal implementation

Research and Training Design Intern - Elasticintas Teresita S.A. de C.V.
June 2024 - August 2024

- Identified requirements and conducted 5 interviews with management and staff
- Designed training manuals for warehouse staff and Procurement office based on field observations and interviews
- Created digital manuals and reduced warehouse staff training by 3 days

Skills

UX Research and Design Methods: Journey Mapping, User Interviews, Surveys, Usability Testing, Digital Prototyping, Physical Prototyping, Data Analysis

Technical: Figma, Miro, Adobe Illustrator, Blender, Python, HTML/CSS/JS, C++

Languages: English (Native), Spanish (Native), French (B2)
